

FAME RENTAL FUNDAMENTALLY CHANGES HOW YOU, YOUR EMPLOYEES, VENDORS, CUSTOMERS, AND DEVICES INTERACT.

CHANGE IS GOOD.

Everybody connected. The future of rental software is now.

One integrated ERP – Fame Rental is powered by a central database that gives you total control over rental data. Anyone on your team – including your customers – can ask anything from anywhere on any device and get real-time answers.

Asset-centric – Fame Rental provides cradle-to-grave enterprise asset management for your assets and your customers', purchased or financed. You get scheduled and unscheduled maintenance management, serialized and bulk assets, inspections with photos, integrated telematics, even a P&L on each asset. See your data by cat-class, by branch location, and more. Enjoy longer asset life, improved up time, boosted ROA, even know when to buy or sell equipment. Better data adds up to higher profits.

Web-enabled – Everybody gets the same functionality on every device – real-time data and event sharing with fully integrated communication (sms and email). Connect the field with home base – sales with maintenance, drivers with technicians, accounting with the warehouse. And your customers are empowered like never before. Intuitive, built-in dashboards help everybody work smarter than ever.

Everyone connected, with everything – Expand your company's command of data further with the Internet of Things – Fame Rental works with Rouse, SmartEquip, MapBox, Avalara, Samsara, Century eBiz, and more. Everybody on the same page means better decisions are made. Efficiency gains can be exponential.

WE BUILT EVERYTHING INTO FAME RENTAL. AND EVERYBODY.

RENTAL & SALES

- Combine rentals and sales on one ticket, handle tickets from quote to closing, manage required items and fees
- Flexible rate structures, billing algorithms, and credit card auto-charging
- Real-time notifications and integrated logistics management

ASSET MANAGEMENT

- Enterprise-level asset accounting, with individual and mass transfers and retirements
- Manage serialized or aggregated assets, component and maintenance, repair parts, telematics integration, warranties
- Integrations with rental, purchasing, accounts receivable, and financials

ASSET FINANCING

- Compliance with all ASC 842 regulations
- Loan and lease management for scheduled payments to asset-based lenders, handling debt reclassifications, and allocating interest to specific assets
- Allows early payoffs of assets with options to reamortize

PURCHASING & ACCOUNTS PAYABLE

- Three-way matching, installment payments, payment wizard, and average lead times for ordering optimization
- Real-time integration to financials, inventory, and fixed assets

INVENTORY MANAGEMENT

- Multiple inventory costing methods and integration with purchasing, sales, and fixed assets
- Multi-warehouse, with optional multi-bin
- Optimized inventory levels with integrated MRP

ACCOUNTS RECEIVABLE

- Real-time posting from rental billings and work orders, optional installment payments, and real-time integration with financials
- Built-in collections / CRM with dunning letters and late fees

FINANCIALS

- Versatile chart of accounts and posting periods
- Optional cost accounting and integrated project accounting
- Full suite of financial and accounting reports

BANKING

- POS payment options: cash, checks, wires / ACH, credit cards, and gift cards
- Deposit management and bank integration for account reconciliation and cash drawer management

HR / TIME CAPTURE

- Create employee profiles and track skills
- Facilitate work assignments for your team
- Track clock-in / clock-out, availability, and pay hours
- Integrate work time capture for customer billing and analysis

CUSTOMER PORTAL

- Manage account details, browse inventory, build a cart, check equipment and invoices, call off rented equipment, and manage credit cards on account
- Salesperson notification when requests are posted
